

SEO AUDIT REPORT

TIMC — Talha Integrated Modern Company

Full technical, on-page, content, and local SEO audit follow-up for **www.trsko.net** — a Jeddah-based general contractor and heavy equipment rental company serving projects across Saudi Arabia.

Site: <https://www.trsko.net>

Source audit: TIMCSEOAudit.pdf (20 August 2026)

Implementation follow-up: 21 August 2026

Prepared by: WeRQA

Executive summary. The independent audit found a solid technical build (clean URLs, sitemap, robots, HTTPS, structured data) but weak commercial visibility — mainly from an unclaimed Google Business Profile, a www/non-www split, thin secondary titles, a truncated equipment-rental meta description, and local/off-page gaps. WeRQA has now implemented the *developer-owned* fixes from that audit. Items that require TIMC marketing/ops (GBP claim, reviews, Arabic site) remain open and are listed clearly below.

Fixed DEV SEO ITEMS	Open LOCAL / OPS ITEMS	38 SITEMAP PAGES IN GSC	www CANONICAL HOST ENFORCED
---	--	---	---

01 — WHAT THE AUDIT FOUND VS WHAT WE FIXED

Same findings as the external audit, with an implementation status for each.

SEV.	AREA	AUDIT FINDING (BEFORE)	WHAT WERQA FIXED / STATUS	STATUS
CRITICAL	www / non-www	trusco.net and www.trusco.net both returned 200 — ranking signals could split	Added permanent 301 in <code>vercel.json</code> : all apex traffic → <code>https://www.trusco.net/*</code>	FIXED
CRITICAL	Mobile LCP	Mobile homepage LCP ~6.3s; hero media flagged as main contributor	A mobile still-image LCP change was trialled, then reverted on client request . Hero video restored on all breakpoints.	REVERTED
CRITICAL	Google Business Profile	Unclaimed “Talha Rental Services” listing; NAP mismatch vs website	Requires TIMC to claim/verify GBP and align name, address, phone with the website	TIMC
HIGH	Equipment rental meta	Meta description cut off mid-word (“...phases. O”)	Word-boundary clipper + complete Jeddah/service descriptions on all service pages	FIXED
HIGH	Thin page titles	“Our Services TIMC”, “About Us TIMC”, “Contact Us TIMC” too short / no location	Expanded titles with Jeddah / contractor / equipment-rental keywords (About, Services, Contact, Clients, Projects, service detail pages)	FIXED
HIGH	Reviews / directories	Only one GBP review; no industry directory presence	Marketing/ops action: request client reviews + list on 3–5 Saudi/GCC directories	TIMC
HIGH	Arabic site	English-only; no hreflang /ar content for local Arabic search	Larger content + development project — not in this code pass	FUTURE
MEDIUM	Project metas	Portfolio descriptions ~40 chars (“Supply of Equipment...”)	Templated descriptions: project + TIMC scope + client + location, Saudi Arabia	FIXED
MEDIUM	Image alts	2 images missing/weak alt coverage on shared chrome	Logo alt set to TIMC; page heroes / project cards already carry descriptive alts	FIXED
QUICK	Sitemap lastmod	All URLs shared the same “now” timestamp	Stable lastmod dates by section (site / services / portfolio / projects)	FIXED
QUICK	Anchor text	Non-descriptive “Learn more” / vague CTA links	Replaced with “View {Service}”, “View TIMC Services”, “Contact TIMC About Your Project”	FIXED
QUICK	Schema sameAs	Organization JSON-LD had empty sameAs array	LinkedIn company URL added to sameAs	FIXED
QUICK	Home description length	Root meta description risked SERP truncation (~176 chars)	Shortened default description to ~142 characters	FIXED

02 — TECHNICAL SEO (AFTER FIXES)

Already strong (audit agreed) - robots.txt allows crawl; blocks only /api/ - sitemap.xml live — GSC Success, 38 pages discovered - HTTPS + HSTS - Real HTTP 404 page - Organization / LocalBusiness JSON-LD present - Responsive layout	Strengthened in this pass - Apex → www 301 consolidation - Meaningful sitemap lastmod values - sameAs identity link (LinkedIn) - Safer meta truncation (no mid-word cuts) - Richer service + project metadata
--	---

03 — ON-PAGE EXAMPLES (BEFORE → AFTER)

PAGE	BEFORE (AUDIT)	AFTER (IMPLEMENTED)
/services	Title ~“Our Services TIMC” (thin)	“Contractor & Equipment Rental Services in Jeddah TIMC”
/about	“About Us TIMC”	“Jeddah General Contractor Since 2010 TIMC”
/contact	“Contact Us TIMC”	“Contact — Jeddah Contractor & Equipment Rental TIMC”
/services/equipment-rental	Meta cut off mid-word; thin title	Complete description; title “Heavy Equipment Rental in Jeddah TIMC”
/portfolio/...	~40-char scope-only description	“[Project] — TIMC’s [scope] for [client] in [location], Saudi Arabia.”
Host URLs	Apex and www both live	Apex permanently redirects to www

04 — LOCAL SEO & VISIBILITY (STILL OPEN)

The audit’s keyword check (20 Aug 2026) found brand visibility for “TIMC / Talha Integrated Modern Company”, but not yet page-one rankings for commercial terms such as “equipment rental Jeddah” or “general contractor Jeddah”. That remains expected until local trust signals catch up.

ACTION	OWNER	WHY IT MATTERS
Claim & verify Google Business Profile; match website NAP exactly	TIMC Marketing / Ops	Highest-impact local-pack fix; stops wrong phone/address from ranking
Request reviews from recent project clients	TIMC Marketing / Ops	Competitors already outrank on review volume
List TIMC on 3–5 Saudi/GCC contractor / rental directories	TIMC Marketing / Ops	Backlinks + citation consistency
Arabic core pages (/ar/) with hreflang	TIMC + WeRQA (future sprint)	Captures Arabic local search demand

05 — PRIORITIZED STATUS VS ORIGINAL ACTION PLAN

#	ORIGINAL AUDIT ACTION	STATUS AFTER WERQA PASS
1	Claim & fix Google Business Profile	OPEN — TIMC
2	301 redirect trsco.net → www.trsco.net	FIXED
3	Fix mobile homepage LCP	TRIED, THEN REVERTED PER TIMC
4	Rewrite titles & meta descriptions	FIXED
5	Reviews + directories	OPEN — TIMC
6	Arabic site	FUTURE SPRINT
7	Alts, descriptive links, sameAs, sitemap lastmod	FIXED

06 — CLIENT TAKEAWAY

Before this fix pass • Good site, weak host consolidation • Broken/truncated service snippet risk • Thin secondary titles • Empty schema sameAs • Weak project long-tail metas	After this fix pass • Single canonical host (www) • Complete, keyword-aware titles & descriptions • Cleaner crawl signals in sitemap • Stronger entity markup (LinkedIn sameAs) • Remaining gap = local GBP + reviews + Arabic
--	--

Honest ranking note: these fixes improve crawlability, snippets, and relevance signals. They do not by themselves guarantee page-one rankings for competitive terms. Local pack performance still depends on GBP verification, reviews, and citations.

Confidential — prepared for TIMC client review.
Based on the independent TIMCSEOAudit.pdf (live crawl / PageSpeed / Maps checks, 20 August 2026) plus WeRQA implementation status as of 21 August 2026.
