

TIMC SEO Implementation Report

Before vs After

Prepared for Talha Integrated Modern Company (TIMC)
Domain: <https://www.trsko.net>
Focus: What was missing before the SEO sprint, and what WeRQA added after
Report date: 20 August 2026
Prepared by: WeRQA

Purpose of this report. This document shows only the SEO work on the current TIMC website: the gaps that existed *before* SEO implementation, and the improvements that were *added after*. It is not the old-PHP vs new-site architecture comparison (that is a separate report).

Before SEO GAPS ON NEW SITE	After SEO ITEMS DELIVERED	38 SITEMAP PAGES IN GSC	Done CODE SEO COMPLETE
---------------------------------------	-------------------------------------	-----------------------------------	----------------------------------

1. One-look summary

Before SEO - No robots.txt / sitemap.xml - Several pages reused homepage title/description - No Open Graph / Twitter / canonical setup - No Organization / Service / Breadcrumb schema - Weak internal links to service detail pages ~49 MB company profile PDF - Limited Jeddah / KSA keyword targeting - Home H1 brand-only ("TIMC") - Empty alts on key heroes / project cards - Heavy hero/about videos	After SEO - Live robots.txt + sitemap.xml (GSC Success) - Unique titles & descriptions on key routes - OG, Twitter, canonicals, share image - JSON-LD schema across site + detail pages - Real <code>/services/[slug]</code> internal links - Profile PDF compressed to ~5.4 MB - Natural local keyword pass (meta + copy) - Topical H1: TIMC + contractor in Saudi Arabia - Descriptive image alts added - Videos/images compressed for faster load
--	---

2. Full difference table — missing before → added after

#	AREA	BEFORE SEO (MISSING / WEAK)	AFTER SEO (WHAT WE ADDED)	STATUS
1	Sitemap & robots	MISSING No crawler discovery files	ADDED /robots.txt + /sitemap.xml	Done
2	Page titles	MISSING Clients / Contact / Projects inherited homepage title	ADDED Unique title + description per page	Done
3	Social & canonical	MISSING No metadataBase, OG, Twitter, canonicals	ADDED Full social meta + canonical URLs + OG image	Done
4	Structured data	MISSING No schema markup	ADDED Organization, Service, Breadcrumb, CreativeWork JSON-LD	Done
5	Internal linking	WEAK Service links were mostly hash/anchors	ADDED Footer/cards link to /services/[slug]	Done
6	Profile PDF	HEAVY ~49 MB download	ADDED Compressed to ~5.4 MB	Done
7	Canonical domain	WRONG Some config still pointed at old domain idea	FIXED Canonical locked to https://www.trsko.net	Done
8	Title quality	WEAK Long / ALL-CAPS patterns	IMPROVED Shorter professional TIMC titles	Done
9	Legal copy	WEAK “Before public launch” disclaimers	CLEANED Privacy / Terms launch wording removed	Done
10	Local keywords	WEAK Limited Jeddah / Saudi Arabia phrasing	ADDED Keyword pass on meta, hero, services, FAQ	Done
11	Home H1	MISSING H1 was brand-only (“TIMC”)	ADDED H1 = TIMC + “General Contractor in Saudi Arabia”	Done
12	Image alts	MISSING Empty alts on heroes / project cards	ADDED Descriptive alts on heroes, cards, showcase, 404	Done
13	Media weight	HEAVY Hero ~8 MB; about ~8.6 MB; projects hero ~927 KB	COMPRESSED Hero ~3 MB; about ~6.2 MB; projects hero ~472 KB	Done
14	Brand naming	INCONSISTENT ALL-CAPS company string in places	FIXED Title-case TIMC legal/display name for metadata/schema	Done
15	Search Console	NOT SET Property / sitemap not submitted	ADDED Verified + sitemap submitted (Success, 38 pages)	Done

3. Delivery phases (how the work landed)

PHASE	WHAT WAS ADDED
Phase 1 — Foundation	Unique titles, metadataBase, OG/Twitter/canonicals, robots, sitemap, Search Console file
Phase 2 — Relevance	JSON-LD schema, service URL internal links, domain alignment to www.trsko.net
Phase 3 — Assets	Profile PDF compression, OG share image, legal copy cleanup
Phase 4 — Keywords & polish	Jeddah/KSA keyword pass, topical H1, image alts, video/image compression
Phase 5 — Google follow-through	Sitemap submitted in Search Console → Success / 38 discovered pages

4. Concrete examples of “before → after”

EXAMPLE	BEFORE	AFTER
Homepage title	Generic / less local contractor framing	TIMC Jeddah Contractor & Equipment Rental Saudi Arabia
Home H1	TIMC only	TIMC + General Contractor in Saudi Arabia
/contact metadata	Inherited homepage meta	Dedicated contact title + Jeddah enquiry description
Service pages	Harder for Google to treat as separate destinations	Own URLs + Service schema + localised meta
Company profile download	~49 MB	~5.4 MB
Google discovery	No sitemap for the new app	Sitemap Success — 38 pages discovered

5. What is left after SEO (honest)

- **Not missing in code** — technical SEO items from the audit are implemented and deployed.
- **Ongoing (TIMC / Google)** — wait for indexing to mature; optionally Request indexing on priority URLs; review Performance for 30 days.
- **Not guaranteed by SEO alone** — #1 rankings for broad terms still depend on competition, backlinks, and time.

6. Client takeaway

Before SEO: the new website looked modern, but Google lacked the files and page signals needed to understand and discover it properly.

After SEO: the same website is crawlable, described clearly, structured with schema, faster to download key assets, and already accepted in Search Console with a successful sitemap.
