

TIMC Website SEO Audit Report

Prepared for Talha Integrated Modern Company (TIMC)
Domain: <https://www.trsko.net>
Report date: 20 August 2026
Revision: v1.2 — remaining opportunities implemented + gap difference table
Prepared by: WeRQA

Executive summary. The TIMC Next.js site now has a complete technical SEO foundation plus the follow-up polish called out in earlier report versions: natural Jeddah / KSA keywords, a topical home H1, descriptive image alts on heroes and project cards, compressed hero/about videos and a large page hero image, and consistent TIMC brand naming in company metadata. Client-side work that remains is Search Console monitoring (submit sitemap, request indexing).

6	6	1	1
HIGH ITEMS DONE	MEDIUM ITEMS DONE	LOW MEDIA IMPROVED	CLIENT GSC ACTION

1. Gap difference — what was missing vs what we added

This table is the difference view: earlier audit gaps on the left, what was shipped into the project on the right.

ID	EARLIER GAP (MISSING / WEAK)	WHAT WE ADDED IN THE PROJECT	STATUS
H1	MISSING No robots.txt / sitemap.xml	ADDED /robots.txt + /sitemap.xml (App Router)	DONE
H2	MISSING Unique titles on Clients / Contact / Projects	ADDED Unique title + description per route	DONE
H3	MISSING metadataBase, OG, Twitter, canonicals	ADDED Sitewide + page OG/Twitter/canonical helpers	DONE
H4	MISSING Organization / Service / Breadcrumb schema	ADDED JSON-LD on root, services, portfolio, projects	DONE
H5	WEAK Services linked as hashes only	ADDED Real /services/[slug] internal links	DONE
H6	HEAVY Profile PDF ~49 MB	ADDED Compressed profile PDF ~5.4 MB	DONE
M1	WRONG Canonical domain pointed at talhaimc.com	FIXED Canonical = https://www.trusco.net	DONE
M2	WEAK Long / ALL-CAPS title patterns	IMPROVED Shorter professional titles + template	DONE
M3	INCONSISTENT ALL-CAPS legal company string in metadata	FIXED Title-case “Talha Integrated Modern Company” in company data / schema	DONE
M4	WEAK “Before public launch” legal disclaimers	CLEANED Privacy / Terms launch wording removed	DONE
M5	MISSING Home H1 was brand-only (“TIMC”); empty alts on heroes / project cards	ADDED H1 = TIMC + “General Contractor in Saudi Arabia”; descriptive alts on internal heroes, project cards, services showcase, 404	DONE
M6	WEAK Limited Jeddah / KSA phrasing	ADDED Keyword pass on meta, hero, services intro, FAQ (no layout change)	DONE
L1	HEAVY Hero video ~8.0 MB; about video ~8.6 MB; projects hero WebP ~927 KB	COMPRESSED Hero ~3.0 MB; about ~6.2 MB; projects hero WebP ~472 KB	DONE
L2	MONITOR Legacy GTM vs GA4 continuity	GA4 wired in app; Search Console file live — TIMC should keep GA4 as source of truth	MONITOR
GSC	CLIENT Sitemap submit / URL inspection	Code ready; TIMC must submit sitemap in Google Search Console	CLIENT

2. What was implemented in this revision (v1.2)

- **Home H1 topical clarity** — single H1 keeps TIMC large and adds “General Contractor in Saudi Arabia” as the second H1 line.
- **Image alt coverage** — InternalPageHero defaults descriptive alts; ProjectGrid uses project name + location; ServiceShowcase + 404 heroes labelled; logo mark stays decorative when wordmark is present.
- **Media compression** — home hero MP4 8.0→3.0 MB; about MP4 8.6→6.2 MB; projects-page-hero WebP 927→472 KB.
- **Brand string** — company legal/display name normalised to title case for schema and metadata consumers.

3. Earlier foundation (still in place from v1.0–v1.1)

- Canonical domain <https://www.trsko.net>
- Root + page metadata, Open Graph, Twitter, robots
- /robots.txt and /sitemap.xml
- Organization / Service / Breadcrumb / CreativeWork JSON-LD
- OG default image 1200×630; profile PDF ~5.4 MB
- Service detail URLs linked from footer / cards
- Jeddah / KSA keyword targeting pass
- Legacy PHP redirects; GA4; Search Console verification file
- Footer: Developed by WeRQA

4. Metadata coverage matrix

ROUTE	UNIQUE TITLE / DESCRIPTION	NOTES
/	Yes	Topical H1 + Jeddah/KSA meta
/about	Yes	Keyword-enriched; hero alt set
/services	Yes	Keyword-enriched; hero alt set
/services/[slug]	Yes (dynamic)	Schema + localised meta
/clients	Yes	Fixed + keyword pass
/contact	Yes	Fixed + keyword pass
/projects/ongoing	Yes	Project card alts added
/projects/completed	Yes	Project card alts added
/portfolio	Yes	Good
/portfolio/[slug]	Yes (dynamic)	Schema added
/privacy	Yes	Disclaimer cleaned
/terms	Yes	Disclaimer cleaned

5. What is still outside the codebase

1. Google Search Console (TIMC action)

- Confirm <https://www.trsko.net/robots.txt> and [/sitemap.xml](https://www.trsko.net/sitemap.xml)
- Submit <https://www.trsko.net/sitemap.xml>
- URL Inspection → Request indexing on Home, Services, Contact, key projects
- Monitor Page Indexing for ~30 days

2. Analytics continuity — treat GA4 as the live measurement source; retire or ignore legacy GTM if it is no longer firing.

6. Ranking expectation (honest)

These changes improve crawlability, relevance signals, and page experience for realistic local queries (contractor Jeddah, equipment rental Saudi Arabia, TIMC services). They do **not** guarantee #1 ranking for broad terms such as “construction company.” Ranking also depends on backlinks, competition, and ongoing content — not only on-site SEO.

7. Recommended next actions for TIMC

1. Deploy / confirm latest build is live on www.trsko.net.
2. Submit the sitemap in Google Search Console.
3. Request indexing for priority URLs.
4. Review Search Console coverage after 2–4 weeks.

Confidential — prepared for TIMC client review.

This is a technical SEO audit and implementation summary, not a paid media or content-marketing plan.
